RE: Energy Fuels Nuclear, Sahara Mine, ACT/015/026

On July 17, 1987, I checked the subject mine to see if they had cleaned up the site - they had. A good job was done. A photo of the site follows:

Photo of the site taken July 17, 1987 during a rainstorm. The site has been cleaned up. The concrete floor and metal building were allowed to stay as this mine may be reopened sometime in the future. The mine entrance has a locked gate.
